BAOFENG™ UV-9R PRO TWO-WAY RADIO

YOU'RE SIMPLY MORE EFFICIENT

Introduction

The Baofeng UV-9R Pro is a popular and powerful walkie talkie designed for both professional and personal communication. It is widely used in security services, event management, construction sites, hotels, outdoor activities, emergency situations, and by amateur (HAM) radio operators.

Uses

The Baofeng UV-9R Pro is ideal for security guards, event coordinators, warehouse staff, trekking and camping groups, and emergency communication. It provides fast, reliable, and instant communication without depending on mobile networks.

Connectivity

This walkie talkie supports both VHF (136–174 MHz) and UHF (400–520 MHz) frequency bands. The dual-band and dual-display feature allows users to monitor two channels simultaneously. It also supports external antennas, which help improve signal strength and communication range.

Transmission

The Baofeng UV-9R Pro offers a maximum RF output power of 1W/5W with high and low power modes. It uses FM modulation and supports both wideband and narrowband operation. The maximum frequency deviation is ± 5.0 kHz in wideband and ± 2.5 kHz in narrowband, ensuring clear and stable transmission.

Reception

With a receiver sensitivity of 0.2 μ V at 12 dB SINAD, the UV-9R Pro can receive weak signals clearly. Low spurious emissions (less than -60 dB) help reduce interference and improve overall communication quality.

Specifications

The device features 1000 mW audio output, good adjacent channel selectivity, and emission classes 12.5K#F3E (wideband) and 1K#F3E (narrowband). Overall, the Baofeng UV-9R Pro is a reliable, versatile, and cost-effective walkie talkie for clear and efficient two-way communication.
